Recall

Correctly Classified (as Positive)

Total objects that should be retrieved (Actually Positive

Meaning

Does the classifier miss any of Positive Objects ?

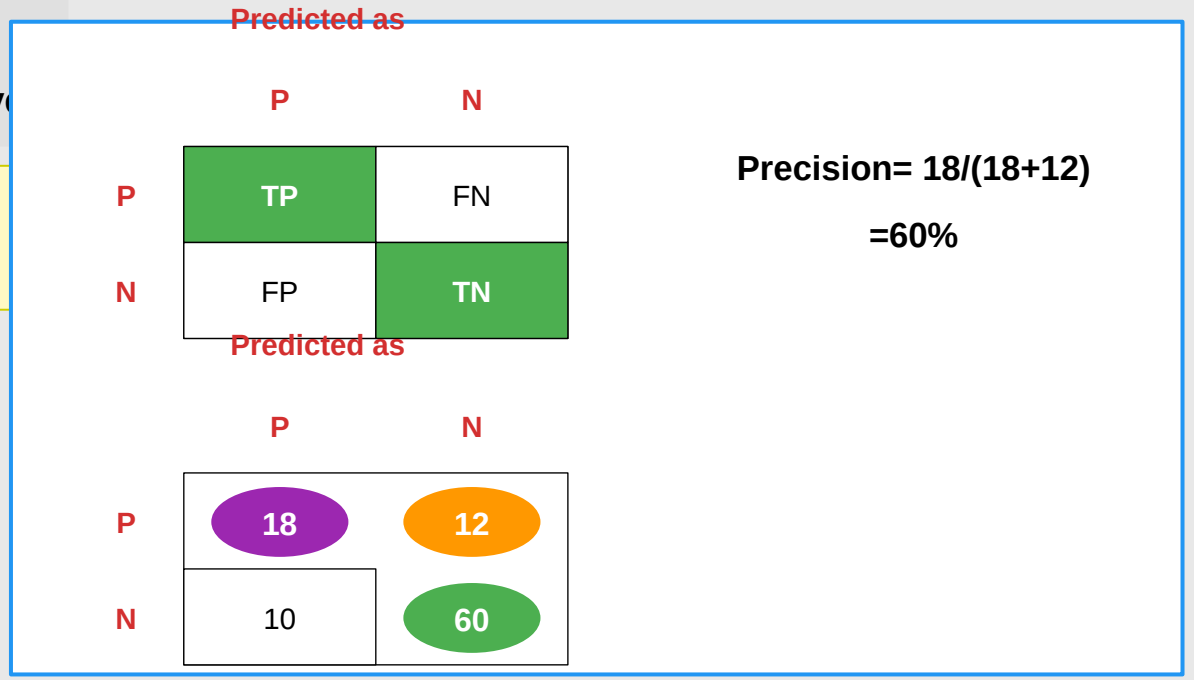

$$\text{Recall} = \frac{TP}{TP + FN}$$

Positive Classified as +ive

Positive Classified as -ive

All Positive Samples in the Dataset

*If you said: I picked **ALL** Positive objects,*
can I trust you ? At what %?

Precision= 18/(18+12)

=60%
